To section III

Claims 123 and 126-136 relate to subject-matter considered by this Authority to be covered by the provisions of Rule 67.1(iv) PCT. Consequently, no opinion will be formulated with respect to the industrial applicability of the subject-matter of these claims (Article 34(4)(a)(i) PCT).

To section V

1.) The following documents were cited in the search report and were considered for the examination of the present application:

D1: EP-A-0 221 414 (HOECHST-ROUSSEL PHARMACEUTICALS INC.) 13 May 1987 D2: WO 99 40067 A (DUPHAR INTERNATIONAL RESEARCH B.V.) 12 August 1999

The present application is related to thienoisoxazolyl- and thienylpyrazolyl derivatives that are antagonists of the dopamine D4 receptor. These compounds are considered to be useful for the treatment of CNS diseases like obsessive compulsive disorder, schizophrenia or parkinson.

- 2.) D1 discloses related compounds for use as antihypertensive agents. Structures from this document, that would interfer with this application are excluded via proviso (claim 1, page 138, line 13-line 17: Q cannot be indolyl or phenyl). Claims 1-120 (compounds), 121,122 (precursors), 124,125 (composition), 123,126-136 (methods of treatment) and 137-139 (methods of making compounds) are novel (Art. 33(2) PCT), since D1 and D2 (benzisoxazole derivatives) differ strongly with respect to the claimed subject-matter.
- 3.) Claims 1-139 involve an inventive step (Art. 33(3) PCT), since the presently claimed compounds are not suggested by any document of the prior art. Moreover the binding affinity for the dopamine D4 receptor is demonstrated for various examples along with suitable in vivo testings (MK-801 stereotypy in mice) for select congeners.

INTERNATIONAL PRELIMINARY **EXAMINATION REPORT - SEPARATE SHEET**

International application No. PCT/US00/24962

4.) For the assessment of the present claims 123 and 126-136 on the question whether they are industrially applicable, no unified criteria exist in the PCT Contracting States. The patentability can also be dependent upon the formulation of the claims. The EPO, for example, does not recognize as industrially applicable the subject-matter of claims to the use of a compound in medical treatment, but may allow, however, claims to a known compound for first use in medical treatment and the use of such a compound for the manufacture of a medicament for a new medical treatment.

PCT/US00/24962
